

MHZ Technologies is a niche manufacturer's representative, distributor and technical sales consultancy specialising in RF, Microwave and Millimeter wave technologies. MHZTechnologies is a supplier to applications including Defence, Test Equipment, Aerospace, Telecommunications and Medical.

### MHZ Technologies Partners

AccuBeat Ltd. is a leading designer and manufacturer of exceedingly accurate Frequency and Timing solutions and products suitable for Aerospace, Defense, Telecommunications, Research and other applications. Based on over 20 years of experience our patented Rubidium Atomic Clock or OCXO technology with optional GPS disciplining provide frequency accuracy in the range of  $10^{-12}$ , frequency stability in the range of  $10^{-13}$  and time accuracy in the range of nanoseconds

ASB Inc. is a Korea-based RF specialist with over 20 years of experience in designing and manufacturing RF amplifier MMICs for wireless, wired, and microwave systems. Its portfolio covers low noise amplifiers, gain blocks, IF and medium power amplifiers, high power GaN amplifiers, and related RF components used in telecommunications, broadcasting (including CATV/MoCA/SMATV), network infrastructure, GPS/GNSS, and defense and microwave applications from S- to Ka-band. With strong in-house R&D and continuous new product introductions, ASB offers high-performance, cost-effective solutions for 5G, LTE, WiMAX, WLAN, radar, and satellite links, as well as reliable replacement options for many existing RF parts—making it an ideal partner for customers seeking robust, production-proven RF front-end solutions.

MHZ Technologies is the exclusive distributor in UK, Republic of Ireland, Italy and Greece for IMS RESISTORS. Based in the USA, IMS is a world leader in passive components including high power resistors. IMS offers a full complement of resistor and attenuator solutions for applications where data integrity and signal fidelity are integral in the design. IMS resistors can be offered from under 1 ohm to over 1 Trillion Ohms. The "High Mega ohm" products are common to be seen in applications for metering devices.

MHZ Technologies is the exclusive distributor in the UK for Alaris Kuhne who are based in Berg, Germany. Kuhne offers a wide range of off the shelf LNAs, Linear SSPAs, Block Down Converters, Microwave Source Modules, Frequency Multipliers and many other microwave components and sub-systems covering up to 50GHz

Linwave Technology designs and manufactures microwave and RF components and subsystems up to 94GHz. A full test and measurement capability also extends to 94GHz. Linwave utilises state-of-the-art microwave simulation tools for circuit modeling and optimisation to provide robust product solutions. A complete in house chip and wire assembly facility allows production of innovative products by utilising a chip and wire solution integrated with laminate based surface mount techniques.

MHZ Technologies the exclusive representative and distributor for KVG Quartz Crystal Technology GmbH in the UK. KVG is a leading German manufacturer specializing in high-performance quartz crystal components, with over 70 years of innovation in the field. Their product portfolio includes crystal oscillators (XO, VCXO, TCXO, OCXO), filters, and custom-designed quartz solutions tailored for demanding applications. KVG's oscillators are renowned for ultra-low phase noise, high frequency stability, and low G-sensitivity, making them ideal for sectors such as aerospace, defense, satellite communications, medical technology, and high-end audio.

Netcom Inc based in the US state of Illinois is a global proven leader in the design and manufacturing of tunable filters, RF amplifiers, LC filters, and integrated assemblies for the military, aerospace, wireless communications, and medical industries.

Paricon based near Boston, MA is providing next-generation separable interconnection products to the most demanding segments of the electronics market. The heart and soul of Paricon's products is the PariPoser® anisotropic elastomeric fabric suitable up to 110GHz
